

Dynacor Group Inc. (TSX: DNG) has almost three decades of experience processing gold-bearing ore from government-permitted artisanal miners (ASGM), which improves sector governance and miner livelihoods. Backstopped by its Peruvian operations, Canadian-based Dynacor is rolling out an ambitious expansion strategy within Latin America and to Africa. Wholly-owned subsidiary Galam S.A. has launched a pilot plant on its permitted mining concession in Kédougou, southeastern Senegal. The 50-tpd plant will serve as a test ground for Dynacor's expansion into Senegal and Africa at large.

8T of artisanal gold mined annually

Galam – at a glance

Dynacor's 2nd processing plant build and first in Africa

50-hectare property in Kédougou, Senegal's ASGM region

Nameplate capacity of 50 tonnes per day (hard rock)

If successful, pilot plant is expected to be a precursor to a 300-tpd commercial plant

First ore feed at end of Q2-2026

Potential and upside

> Kédougou

Host to significant gold reserves and with exposed gold-bearing core

Host to 13/16 government-defined ASGM corridors

> Senegal

8 tonnes of est. ASGM production versus **+10 tonnes** of LSM production annually

Galam is the first industrial ore-processing plant for ASGM

History

First meeting with Senegal government. Grab sampling

LOI between Dynacor and partners

Purchase of mining concession; completion of EIS

Launch of operations in Q2
